

Practical 5.2

Include, require, date functions in php.

Code:

include function:

```
<?php
echo "<h1>Date Functions:<br /></h1>";
include 'hello.php';
echo "Date: " . date("j") . "<br/>";
echo "Month: " . date("F") . "<br/>";
echo "Year: " . date("Y") . "<br/>";
echo "Today: " . date("jS F Y") . "<br />";
?>
```

Output:

Date Functions:

Date: 16
Month: October
Year: 2023
Today: 16th October 2023

require function:

```
<?php
echo "<h1>Date Functions:<br /></h1>";
require 'hello.php';
echo "Date: " . date("j") . "<br/>";
echo "Month: " . date("F") . "<br/>";
echo "Year: " . date("Y") . "<br/>";
echo "Today: " . date("jS F Y") . "<br />";
?>
```

Output:

Date Functions:

Signature

Date
